PRODUCT POTATOES

MOZIKA

SANTE

MOZIKA PRODUCT INTRODUCTION

Pakistani Mozika potatoes are a highly valued variety known for their excellent texture and versatility. With smooth skin and creamy, firm flesh, they are ideal for various cooking methods, including boiling, baking, and mashing. Their ability to hold shape makes them perfect for salads and side dishes, while roasting enhances their crispness.

Mozika potatoes are also widely used in food processing for high-quality French fries, chips, and wedges due to their high dry matter content. Rich in vitamins and minerals, they are a staple in both homes and restaurants, playing a key role in Pakistan's diverse cuisine.

PRODUCT SPECIFICATIONS

Variety: Mozika

Color: Yellowish-brown skin with creamy white flesh

Shape: Oval to long tubers with shallow eyes

Size: Uniform size ranging from 45mm to 90mm

Dry Matter Content: 18% to 22% (ideal for frying and baking)

Sugar Content: Low, suitable for processing (chips, fries) and fresh consumption

Texture: Firm, with a smooth surface and minimal defects

Shelf Life: Long shelf life, stored at 4°C to 8°C with humidity control

SANTE PRODUCT INTRODUCTION

Pakistani Sante potatoes are a popular variety known for their high quality and versatility. With smooth, light yellow skin and creamy, waxy flesh, they excel in various cooking methods. Their firm texture allows them to hold shape when boiled or roasted, making them ideal for salads, side dishes, and roasting. They also mash easily and are perfect for crispy fries and chips.

Rich in essential nutrients like vitamins C and B6 and potassium, Sante potatoes are a staple in both traditional and modern Pakistani cuisine, contributing to a wide range of delicious dishes enjoyed nationwide.

PRODUCT SPECIFICATIONS

Variety: Sante

Appearance

- Skin: Smooth, shallow eyes, light yellow to pale beige color.
- Flesh: Creamy yellow, firm, and waxy texture.

Size: Uniform sizes, typically medium to large (e.g., 100-250 grams per potato).
